

BYO ekosystem

Byo, the explorer spaceship, and his pilots, Stratos & Kanopee, are looking for earth ecosystem diversity discovery.

This humour and fun edutainment series offers kids to figure out how amazing and precious is natural environment surrounding them and how they may discover it by themselves walking around their own places, at the sea or in mountains.

The series learn them to respect nature as well simple daily acts contributing to its preservation.

Stratos & Kanopee are two funny and weird extraterrestrial characters. They are travelling with BYO around the world. Audience never really knows who is piloting...

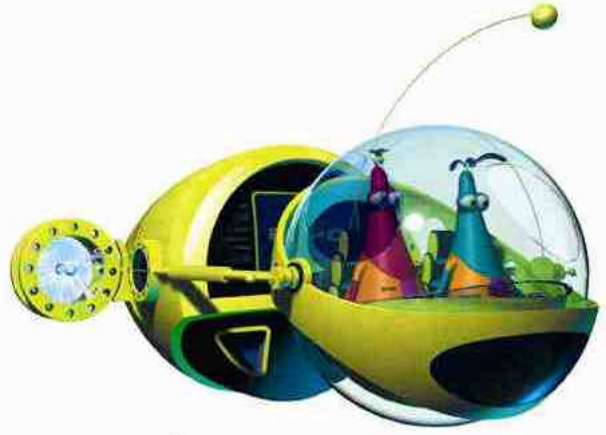

Curious, they wanna understand this world they know nothing about. They keep enjoying, wondering, astonishing, questioning.

Looking for satisfying them, BYO deploys its panoply of gadgets and instruments. However, sometime it's doing a bit too much or making unexpected moves, bringing Stratos and Kanopee into funny or perilous situations.

Authors: Joël Bassaget and Fabien Robert

Producer: Studio Savelli Productions (France)

Format: 26x5'

As easy in airs, underground as under waters, BYO, is an explorer spaceship, made especially for natural environment observation. Its many types of equipment keep surprising by transforming, adapting, zooming, scanning, analyzing, etc. allowing kids to discover wildlife secrets when onboard computer is explaining and illustrating them. So that, it can easily show audience the sap way in a tree, a microscopic sight of pollen or a map situating episode visited places.

Technique: 3D and factual

Target: 4 to 10

Multimedia: interactive applications planned
