

# Micro Macro

## Original science edutainment animation series

Within amazing adventures and weird situations we are travelling with Micro and Macro at the light speed, we are exploring galaxies, planets as well as black holes... An incredible travel through fascinating theories ruling our universe. Science has never been so funny !

Micro is the pupil and Macro the teacher.

Micro is very alive and curious. He is continuously in the move and his knowledge desire reached the point to stop too many times his teacher's explanations.

And Macro does not really like it either to leave foreground to his pupil.

What makes it a really funny duo !

So that they will bring us to discover universe origins ; time and light laws ; relativity complex theories as well as they will make a tour in the fourth dimension !

**Authors:** Silvio Pautasso and  
Giorgio Valentini
